

Information Sheet

Helping Your Business Intelligence Journey

Package: Oracle BI "Enterprise" Install

Duration: 5 days

Overview: Installing an "enterprise" Business Intelligence architecture can be both a daunting challenge and a delicate balancing act: You have to maximise the value, performance and reliability for your Business whilst at the same time keeping hardware spend, delivery costs and timescales to a minimum.

Failure to get the optimum architecture in place will impact the long-term success of your Business Intelligence implementation, risking your ability to deliver a solution that exceeds expectations.

The Peak Indicators "Oracle BI Enterprise Install" service removes the uncertainties and risks associated with getting your Business Intelligence architecture delivered, our experienced architects will ensure you get things right first time, on time and on budget.

Key Features: This high-value offering includes the following deliverables:

- Installation of Oracle BI on two servers (standalone or clustered)
- High-Availability and Load Balancing
- Configuration of an additional Identity Provider
- Connectivity to both Oracle and non-Oracle data sources
- Knowledge transfer to your Development/Operations team
- A comprehensive and easy-to-read Installation Guide, tailored to your own environment
- Support for the installation of an additional Oracle BI environment

To help you prepare for the installation, our service also includes:

- Assistance with choosing a hardware and OS platform
- Hardware sizing for Development, Test and Production environments
- Recommendations for virtualisation
- Guidance on deployment and system management procedures
- A check-list detailing key installation prerequisites and recommendations

Added Value: As part of the service, our Business Intelligence experts will deploy an impressive set of BI "Usage Tracking" dashboards built in-house by Peak Indicators.

These dashboards will enable you to monitor the performance levels and user activity throughout your Oracle BI implementation.
