

# Information Sheet

Helping Your Business Intelligence Journey

**Package:** Oracle BI Health Check

**Duration:** 4 days

**Delivery:** On-site at Customer location

**Overview:** This 4 day "Oracle BI Health-Check" will provide a thorough and independent review of a BI Implementation from both a technical and functional perspective.

Performed by an experienced BI Architect, the review will cover the entire Business Intelligence product stack, from the end user Dashboards and Reports right down to the underlying Data-Warehouse.

The focus will be on making sure the implementation meets or exceeds expectations in a number of key areas, for example:

- Development Standards
- Architecture and Design
- Performance
- Security
- Front-end Usability
- Appropriate use of Product Features and Tools

At the end of the review process, the Customer will be presented with a detailed set of findings and constructive recommendations.

The Health-Check will typically involve the following tasks:

- Implementation Overview with Project Management Team
- Design / Architecture Review with Implementation Team
- Review with Business Sponsors / End Users
- Detailed Review of BI Implementation:
  - BI Dashboards
  - BI Reports
  - BI Repository (incl. Subject Area Design)
  - BI Server Caching
  - Data-Model
  - ETL Process
  - Performance
  - Security
  - Documentation
  - Configuration Management
  - Release Management
  - Documentation of Findings and Recommendations
  - Presentation of Findings and Recommendations
  - Next Steps Workshop
