

Information Sheet

Helping Your Business Intelligence Journey

Package: Oracle BI Performance Tuning

Duration: 5 days

Overview: This risk-free, high-value offering will provide customers with a clear and definitive action plan for obtaining optimum and scalable long-term performance for their Oracle BI implementations.

Our Oracle BI Performance Tuning service is specially designed for customers wishing to:

- Improve performance with an existing Oracle BI implementation
- Prepare for the future expansion and growth of their Oracle BI implementation
- Develop a new Oracle BI solution with peace-of-mind that performance levels will exceed expectations once in Production

A thorough analysis will be conducted across all aspects of your BI implementation and the following areas will be considered:

- Architecture, high-availability, clustering, load-balancing
- Hardware, disk and network configuration
- Dashboard/Report design
- Security model
- BI Repository (RPD) design
- Data-model and SQL optimisation
- BI Server and BI Presentation Services configuration
- ETL efficiency
- BI Server caching
- Parallel query
- Usage Tracking
- Materialized Views, Oracle OLAP, Essbase

Our experienced BI Architects have a proven track record of delivering highly performant and scalable BI solutions involving substantial data volumes, multiple data sources, real-time analysis and large user communities.

We will make sure performance does not hinder the long-term success of your BI solution!

Added Value: As part of the service, our performance experts will deploy an impressive set of BI "Usage Tracking" dashboards built in-house by Peak Indicators.

These dashboards will enable you to monitor the performance levels and user activity throughout your Oracle BI implementation.

Please contact Peak Indicators Limited if you would like further information about this or any of our other offerings:
